

HALF MARATHON

INTERMEDIATE TRAINING PLAN

Welcome to your half marathon intermediate training plan. Firstly, thank you for signing up to an event with Parkinson's UK. You're truly helping us to improve the lives of everyone affected by Parkinson's.

By downloading this training plan you'll be no stranger to the half marathon distance. This plan is for anyone looking to beat their personal best or anyone aiming for a sub two hour half marathon. Covering 13.1 miles under your own steam is a tremendous achievement and from beginning your training, to lining up at the start and finishing, preparing for and completing a half marathon is a great experience.

Don't forget to warm up and cool down prior to any form of exercise. You can find our warm up and cool down section on our training hub. Best of luck! If you have any questions please email us on events@parkinsons.org.uk.

12	Rest	2 miles at estimated HM pace	Rest	3 miles easy run	Rest	Rest	Race day!

HALF MARATHON INTERMEDIATE TRAINING PLAN

Glossary:

Easy run - An easy run is classed as an effort that you'd be able to maintain for a long duration. This would generally be around a 5 or 6 out of 10 effort in regards to the rate of perceived exertion (RPE).

RPE - is the rate of perceived exertion of an exercise. This scale is subjective to each individual. What might be a 6 out of 10 for one person might be totally different for another. Please refer to the table below for the RPE scale.

Intervals - Interval training involves running fast (but not sprinting), over a set distance or time, at an effort level of 9 out of 10. Follow each hard interval with an easy one of at least the same length, then repeat. Try using a treadmill or running track to help you get the distances and times right.

Tempo - is another type of run training whereby you run slightly slower than your 10km race pace. For example, if you plan to run a 10km in 50 minutes your race pace would be 5 minutes per km. On a tempo run you'd aim slightly above this time and do 5:30 minutes per km instead.

Long Run - this is your longest run of the week. The aim of this run isn't to run fast but to get the distance in the legs. This run should be a little harder than your easy run but not as hard as you tempo for example. Aim for a pace around 7 out of 10 in regards to RPE.

HM Pace - is your estimated Half Marathon Pace (HM pace). For example, if you're aiming to get under sub two hours you'd be looking to run your session at a pace of 9 minutes 5 seconds per mile.

Rest - rest days are very important to make sure you recover properly between days of exercise. Rest days don't mean complete inactivity. On a rest day it is a good idea to stretch, foam roll or even do a bit of cross training. This means anything other than running, so you could swim, cycle or go to the gym for example.

Example interval sessions:

All sessions below are to be performed once a sufficient warm up has been completed. Never start exercising without properly warming up the muscles otherwise this could lead to injury.

Session 1:

1 mile at 8 out of 10 effort

1 mile at 5 out of 10 effort

x 3 sets

(if you were to do this for your 6 mile run)

Session 2:

3 minutes of hard running - 8 out of 10 effort

3 minutes of slower running - 5 out of 10 effort

Keep going until you've reached your required mileage for the session

Session 3:

5 minutes of tempo paced running - 8 or 9 out of 10 effort

5 minutes of easy running - 5 out of 10 effort

Repeat for the required mileage for the session

RPE Scale	
10	Maximal effort (sprinting)
9	Really Really Hard
8	Really Hard
7	Harder
6	Hard
5	Challenging
4	Moderate
3	Easy
2	Really Easy
1	Rest
